FlowXP | FlowBook

Accounts that keep themselves.

For builders, developers and every trade.

FlowBook is accounting and GST for Indian businesses, built into FlowXP. Contractors, real-estate developers, electrical and plumbing firms, hardware and material shops, and every other business: pick from ready lists instead of typing, and see every project's money in plain words.

- Projects & sites
- Flats & stage instalments
- Work orders & RA bills
- Retention & advances
- Ready item list
- GST invoices & returns
- WhatsApp & email

FlowXP | FlowBook

MADE FOR YOUR TRADE

One product, set up for the way you work

Choose your trade on day one and FlowBook loads the items, units and GST codes you will actually use. Nothing to type.

Construction companies

One project per site. Material bills, labour and subcontractor work all land on the project, so you see cost against what you have billed the client.

Real-estate developers

List flats and plots, sell each to a buyer, split the price into stage instalments (booking, slab, plaster, possession) and raise each stage invoice in one click.

Contractors & subcontractors

Work orders with quantities and rates, then running-account (RA) bills that bill only the work measured since the last bill, with retention held back.

Electrical contractors & shops

Wires, MCBs, switches, lights, fans and conduits ready to pick, with stock tracked and GST codes filled in.

Plumbing contractors & shops

Pipes, fittings, valves, taps, tanks and pumps ready to pick. Quote, bill and track what is left in stock.

Hardware & building-material dealers

Cement, steel, bricks, tiles, paint, plywood and fasteners with stock in hand, purchase orders, vendor bills and GST invoices. Customer dues chased on WhatsApp.

Interior, paint & finishing

Quotes to invoices, advances from clients, labour by the day, and each job's profit on one screen.

Shops, cafes, clinics & services

On FlowXP your daily till sales become books automatically. Services bill by quote, invoice or recurring invoice.

Also fits

Architects & engineers · Surveyors · Tile & flooring dealers · Sanitary-ware shops · Paint dealers · Plywood & timber · Crane & JCB hire · Transport & trucking · Scaffolding hire · Housing societies

FlowXP | FlowBook

PROJECTS, FLATS AND CONTRACTORS NEW

From the first slab to the last instalment

Projects & sites

Give each site a project. Tag bills, invoices and expenses to it and see money in, money out and profit for that site. Cost types such as Materials, Labour, Contractors and Equipment keep the split clear.

Flats & plots, sold in stages

Add units (A-101, Plot 7), sell to a buyer at an agreed price and split it into stages that total 100%. Raise each stage as a GST invoice when the work reaches it; a cancelled stage can be raised again.

Work orders & RA bills

Agree the work with a subcontractor or client: description, unit, quantity, rate. Each RA bill takes the measured total to date and bills only the new work. It will not let you go backwards or exceed the contract.

Retention held back

Set a retention % on a work order (say 5%) and every RA bill holds it automatically. A bill cannot be paid beyond what is payable now; the held amount stays visible until released.

Advances

Money paid or received ahead of a bill is kept as an advance and applied to the next bill. One card shows every advance and every retention held.

Payments due

One report of who owes you and whom you owe, by age, as of any date. Send reminders from the same screen.

Builder view: only what a site office needs

A third view beside Simple and Full shows Projects, flats, bills, payments and stock, and hides the rest. Switch to Full any time.

Example. Plastering contract with Sharma Contractors: 1,000 sq m internal at ₹100 and 500 sq m external at ₹200, 5% retention. First RA bill: 400 and 100 measured. FlowBook bills ₹60,000 and holds ₹3,000. Second bill: internal now at 700. It bills only the new 300 sq m.

FlowXP | FlowBook

PICK, DON'T TYPE

A ready list of what your trade buys and sells

Over 130 items in ten groups, each with unit, HSN/SAC code and GST rate already filled in. Tick the ones you use, or add a whole group. Goods are tracked in stock from the start.

GROUP	EXAMPLES
Cement, sand & concrete	OPC and PPC cement, river sand, M-sand, aggregates, ready-mix, fly ash
Steel & metal	TMT bars 8–20 mm, binding wire, MS angle, channel, plate, GI sheet, welding rod
Bricks, blocks & masonry	Red and fly-ash bricks, AAC and hollow blocks, paver blocks, granite, marble, Kota
Flooring, tiles & sanitary	Vitrified and wall tiles, adhesive, grout, basins, toilet seats, tanks, sinks
Paint & finishing	Putty, primer, emulsions, enamel, distemper, waterproofing, thinner
Wood, doors & windows	Plywood, block board, flush doors, frames, aluminium and UPVC windows, glass, locks
Electrical	Copper wire, cables, switches, sockets, MCBs, RCCB, DBs, conduits, LED lights, fans
Plumbing	CPVC, PVC and GI pipes, fittings, valves, taps, shower sets, tanks, pumps
Hardware & consumables	Bolts, screws, wall plugs, sealants, adhesives, gloves, helmets, tarpaulin, diesel
Labour & contractors	Mason, helper, carpenter, electrician, plumber, painter by the day; civil, electrical and plumbing contract work; JCB, truck and scaffolding hire

One-click first-run setup

On the home page choose Builder, Electrician, Plumber, Hardware dealer or other. FlowBook adds that trade's items, turns on the right view and opens Projects.

No prices pre-filled

Rates change by city and by week, so you enter each rate once, on your first bill. HSN and GST codes are the common ones; your accountant can change any of them.

FlowXP | FlowBook

EVERYTHING UNDERNEATH

Full accounting and GST, kept right

Sales

GST invoices, quotes, sales orders, credit notes and recurring invoices. Send or remind on WhatsApp or email. Print on A4, A5 or 80 mm.

Purchases

Vendor bills, purchase orders, debit notes and expenses. Input GST is tracked, including reverse charge.

Money

Record payments and match them to invoices. Import a bank statement (CSV) and match each line.

GST, ready for your CA

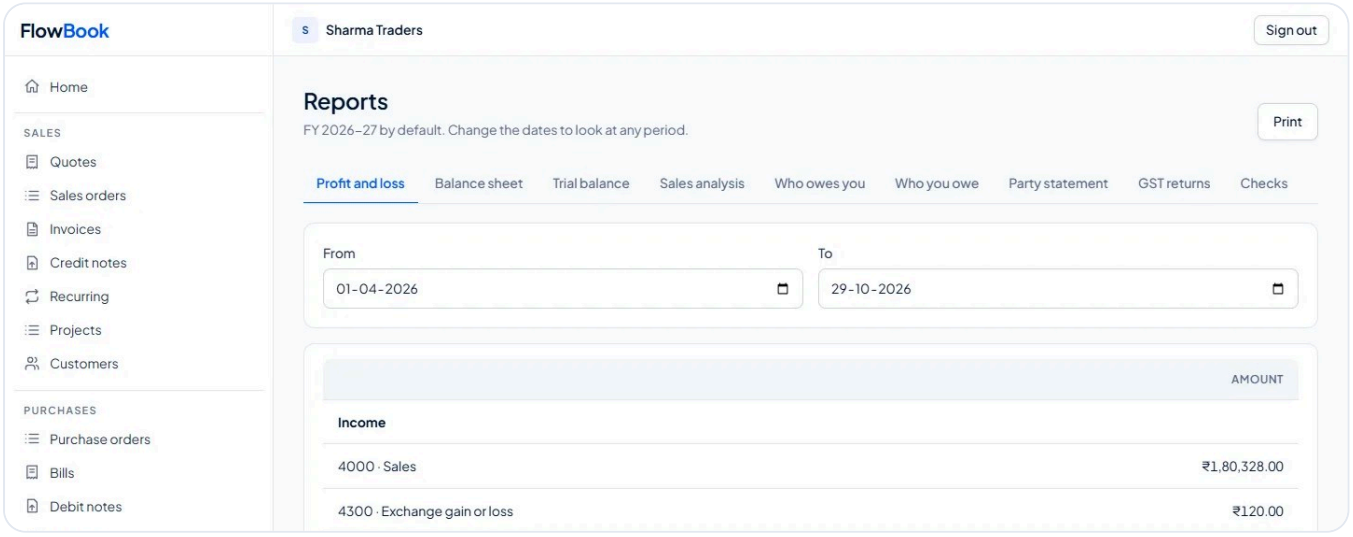

GSTR-1 and GSTR-3B drafts with a check for what the portal usually rejects. Download e-way bill and e-invoice files to upload.

Reports

Profit and loss, balance sheet, trial balance, who owes you, who you owe, and a built-in "books check".

Stock, assets, time

Items and stock levels, fixed assets with depreciation, staff time billed as invoices, foreign-currency invoices.

One sign-in

FlowBook is a page of your FlowXP. No second login, no double entry.

Sales flow in

Till bills from retail, cafe, pharmacy or salon become entries automatically.

Take your data

One click downloads all your data. It is yours.

FlowXP | FlowBook

MADE EASY

Built for owners, not only accountants

Simple, Builder or Full

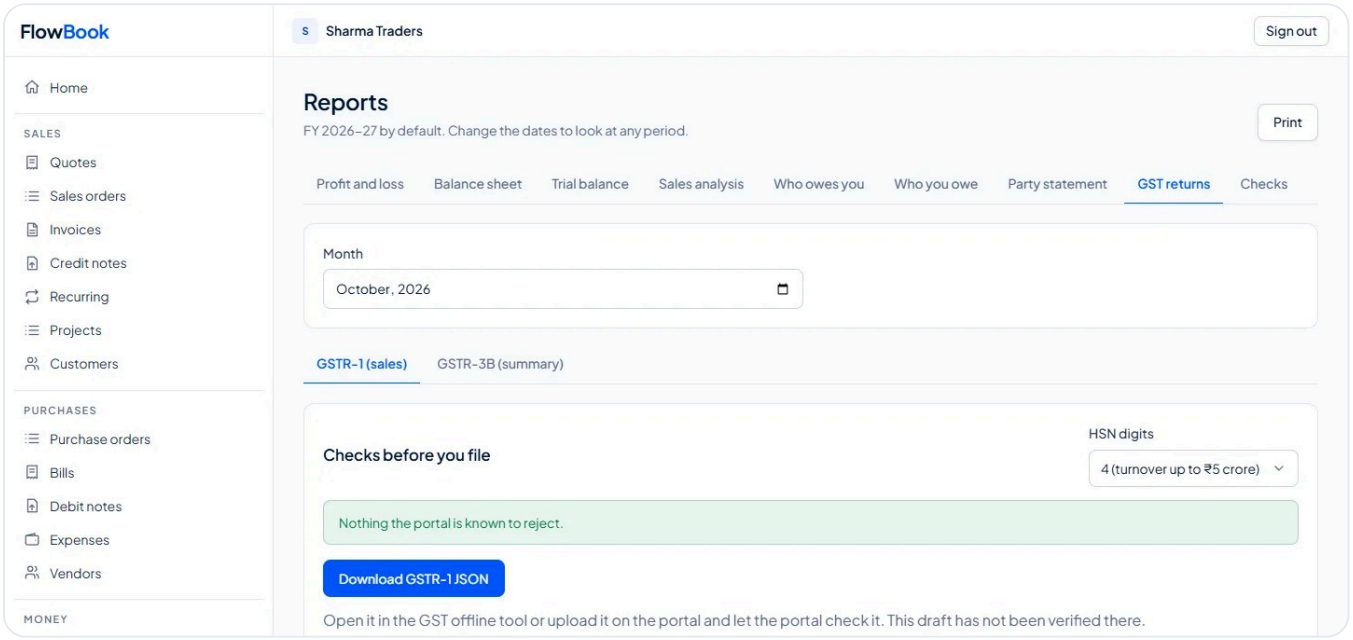

Simple shows the everyday screens. Builder adds sites and flats. Full adds journals, bank and assets. Switch any time.

Help on every page

Steps for the page you are on, and a word list explaining GST, TDS, retention and ageing in plain language.

Ask the assistant

"Who owes me money?" Answers come from your real figures. It only reads; it never changes your books.

Careful with your numbers

- Every entry balances; the books check proves each figure agrees with its documents.
- Issued invoices cannot be edited, only cancelled with a record. Closed periods stay closed.
- Roles control who sees and does what; every change is logged.
- Each business's data is kept separate from every other.

Honest about its limits

- GST returns and e-invoices are prepared as files for you or your CA to upload. FlowBook does not file for you.
- Bank statements come in by CSV, not live bank feeds.
- TDS on contractors (section 194C) is not deducted automatically yet.
- No payroll yet. Screens are mainly in English.
- GST rates in the ready list are the common ones; confirm with your CA.

FlowXP | FlowBook

AT A GLANCE

Who gets what

IF YOU ARE	FLOWBOOK GIVES YOU
A builder or contractor	Projects, work orders, RA bills, retention and advances; cost against billing for every site.
A real-estate developer	Flats and plots, buyers, stage instalments invoiced in one click, and who has paid what.
An electrical or plumbing firm	A ready item list, quotes to invoices, stock in hand and customer dues on WhatsApp.
A hardware or material dealer	Stock, purchase orders, vendor bills, GST invoices and a payments-due list.
A shop, cafe or service business	Your daily sales turned into real books, GST drafts each month, unpaid invoices chased.
An accountant or CA	Full view: journals, chart of accounts, trial balance, bank matching and GST files.

Getting started takes minutes

1
Sign up
Create your FlowXP account and choose FlowBook.

2
Pick your trade
One click loads your items and the right view.

3
Send your first bill
Pick the customer, tick items, Issue, send on WhatsApp.

See your books in a day, not a month.

Start with a free trial and bring your accountant along. Talk to us about the plan that fits your business.
